# Anatomy of a Circle

The key circle ratio is found when the circumference of a circle is divided by its diameter.

Explore and prove this special ratio.

# Ratios of a Right Angled Triangle in a Unit Circle

Ratio Names	Parts in Relationship	Equation	Mnemonic
Sine =	$\frac{\text{opposite}}{\text{hypotenuse}}$	$s = \frac{o}{h}$	SOH
Cosine =	$\frac{\text{adjacent}}{\text{hypotenuse}}$	$c = \frac{a}{h}$	CAH
Tangent =	$\frac{\text{opposite}}{\text{adjacent}}$	$t = \frac{o}{a}$	TOA
